"CS-1Hinge"

Control Switch Safety Cover

For Physical Security

- Improve your **safety** procedures and system **reliability** by using our Rotary **Control Switch Safety Cover.**
- Protect from accidental and unwanted circuit breaker operation.
- Enhance your **Lockout/Tagout** Procedures
- Keep Full 360 degrees visibility
- The CS-1 Hinged Cover cannot be misplaced.

You're in control with the Sentinel CS-1Hinge

SENTINEL CS-1Hinge is easily added to existing rotary control switches. Installation requires only a few minutes and there is no drilling required, no need to remove the switch from the panel and no disturbing the wiring.

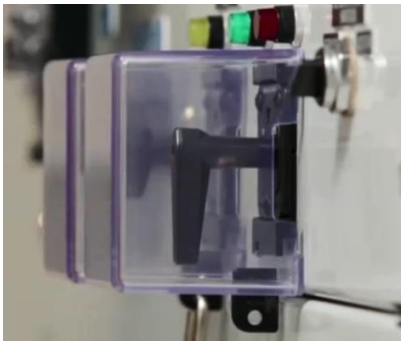

INSTALLATION: SENTINEL CS-1Hinge is supplied as a two-piece kit. Mounted between the Control Switch escutcheon plate and the panel. Backing off the existing mounting screws far enough to slip the two mounting base pieces under the plate and then tighten the screws once again. Longer screws are supplied if needed. The base piece provides the means to lock the Safety Cover in the closed position.

The **CS-1Hinge** has been designed to **hinge upward** allowing access to the control switch. This feature allows room for indicator lights or nameplates above the switch and safety cover.

CS-1 Control Switch Safety Cover

"The CS-1Hinge follows our flagship product the CS-1, which is being used by many large companies. Some of our largest users include Switchgear Manufacturers, Data Centers, Industrial Manufacturers, Government Facilities and Power Generation facilities. We have even supplied the CS-1 to a Nuclear generating plant"
