CS-1 HINGED CONTROL SWITCH SAFETY COVER INSTALLATION INSTRUCTIONS

The Sentinel CS-1Hinge can be installed in minutes and does not require any drilling, disturbing of the switch wiring, or removal of the control switch from the panel. All you need is a flathead screwdriver.

Note: Only qualified persons who are familiar with the control system should install the CS-1Hinge Control Switch Safety Cover.

WHAT'S IN THE BOX

The Sentinel CS-1Hinge comes with two parts: the main switch cover with hinge, and the bottom locking plate. .

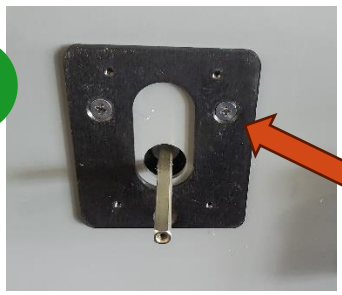

01

First step in the installation process is to remove the control switch handle. Care should be taken **not to move the handle** in an undesirable direction. To do this, you'll need a firm grip on the handle, then remove the screw that holds the handle.

Once the handle is removed, remove the 4 screws and the escutcheon plate

02

Next, loosen the (3) mounting screws from the control switch. Loosen screws to allow 1/8" hinge plates to be installed between the panel and the mounting plate of the switch.

03

From here, you will place the “Bottom/Right Locking Plate” between the Switch plate and the panel.

Then install the Hinge and Cover. Check for alignment and tighten the screws.

04

Ensure the cover operates smoothly and the holes on the locking tabs align properly. Replace the escutcheon plate.

Carefully replace the Control Switch Handle and check the cover operation.

05

CHECK TO BE CERTIAN THERE IS CLEARANCE BETWEEN THE HANDLE AND THE ESCUTCHEON PLATE OF THE CONTROL SWITCH.

You are ready to use the CS-1Hinge Control Switch Safety Cover.
